Why AI?

AI has been there for a long time, but we are at a moment when it is going mainstream

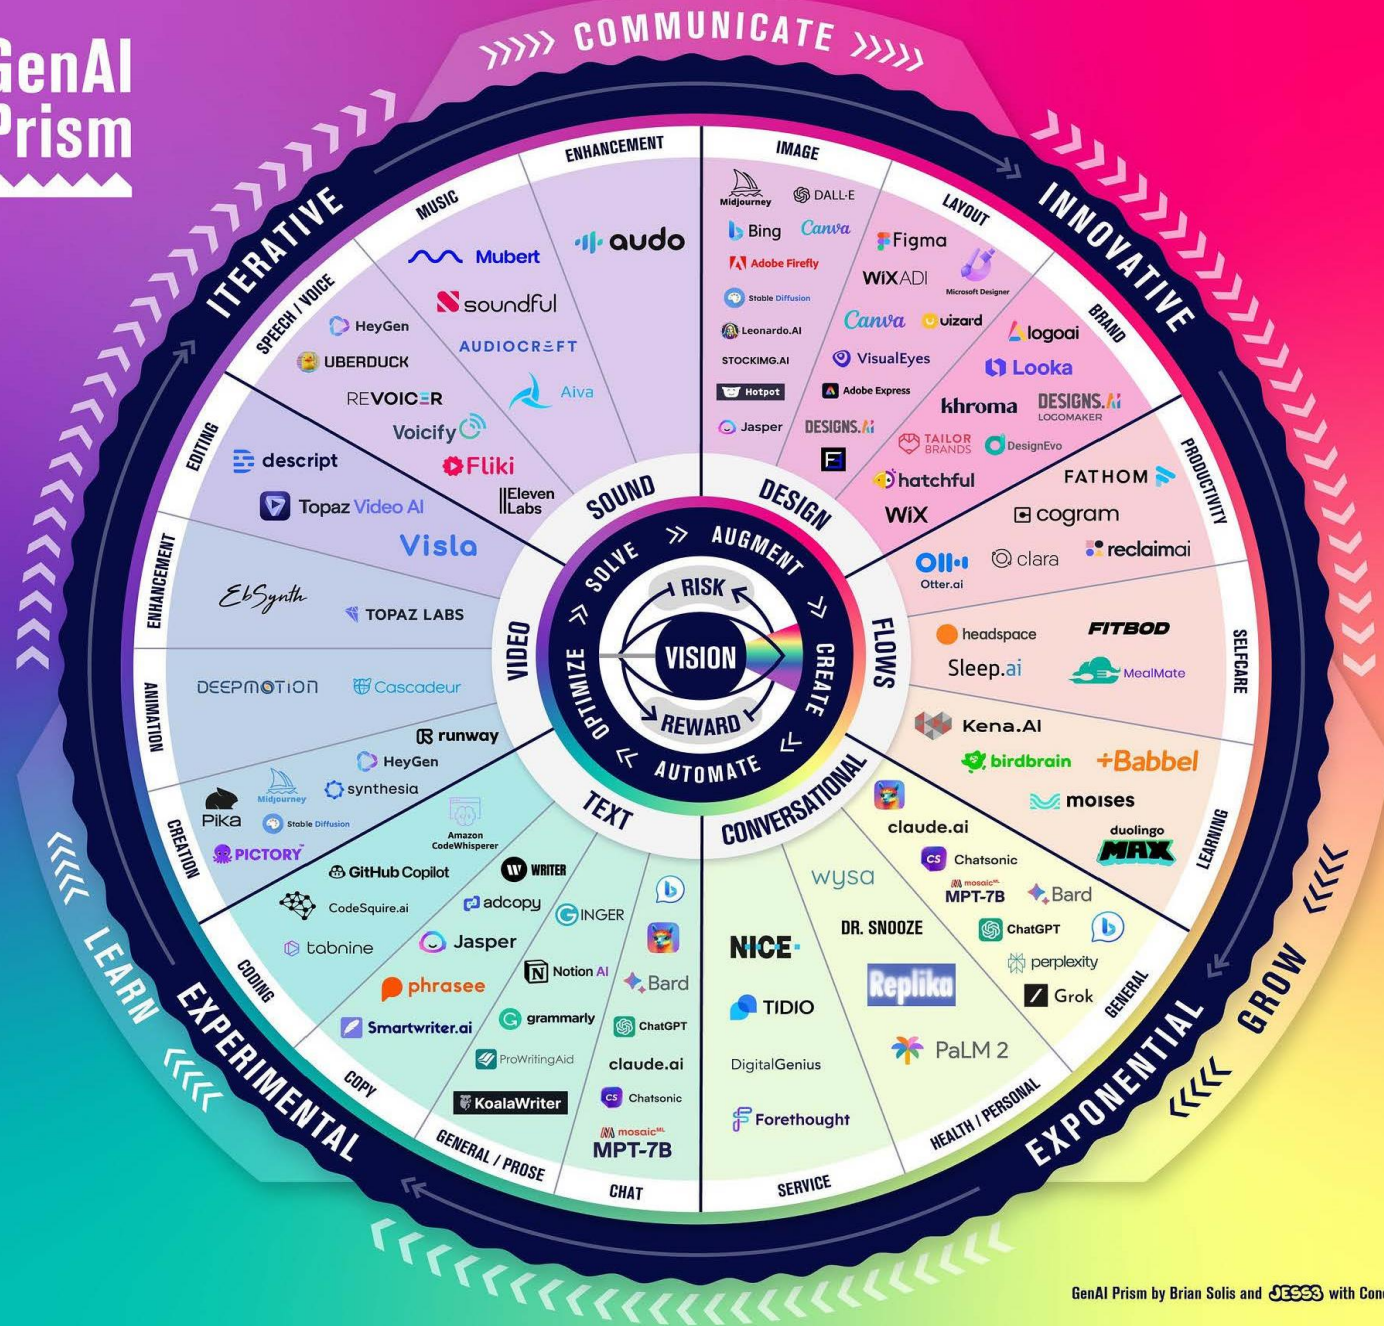

ChatGPT

Apple Intelligence

GenAI Prism

What AI Can Do for Marketers

- Analyze large amounts of data and identify patterns
- Predict trends and future behavior
- Provide personalized recommendations for customers
- Measure consumer sentiment and feedback
- Recognize images
- Generate ideas

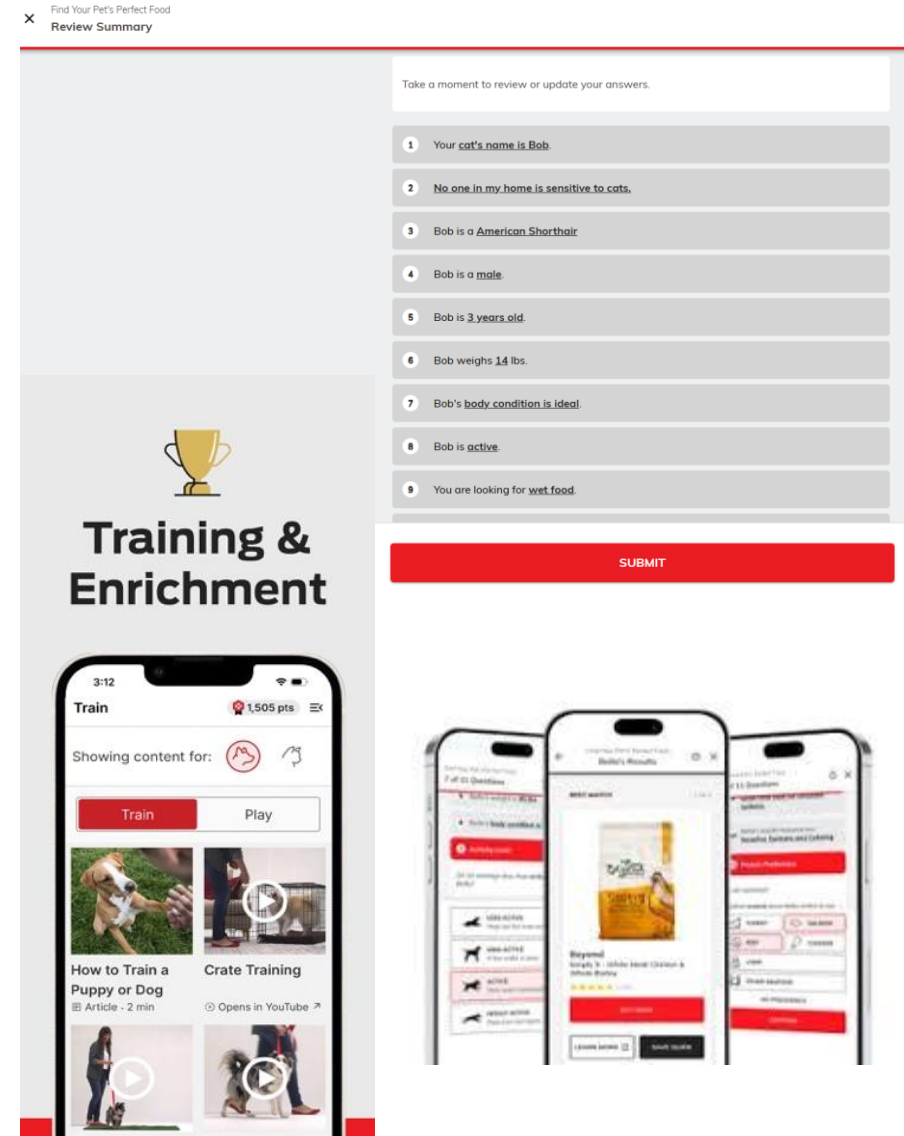

GREENIES: Dogs Write Reviews

- GREENIES developed a campaign targeted at Millennials, who represented the largest share of U.S. pet owners in 2023
- Created an AI tool in partnership with Amazon called “The Dog Interpreter”
- Scan your dog eating the new Greenies Smart Essentials treats and receive their real time thoughts using this AI-powered technology
- A “review” is generated about Greenies Smart Essentials, earning a \$5 reward
- The campaign across a range of Amazon touchpoints, including streaming TV ads, audio ads, online video ads and DSP media that drove consumers to the custom brand Store page

Purina: Using Personalized Content to Increase Customer Acquisition & Loyalty

- Personalization has been key for Purina in acquiring new customers and building loyalty because it shows the brand understands pet owner needs and preferences
- Purina's Pet Food Finder leverages AI to provide personalized product suggestions through a brief online questionnaire
- Purina has developed interactive experiences, like quizzes and surveys, to help pet owners find the best products, with an 86% completion rate and a 65% lead capture rate!
- Preferences, behaviors and specific pet care needs are captured through content engagements, and customers are segmented into audiences, allowing personalized marketing that resonate

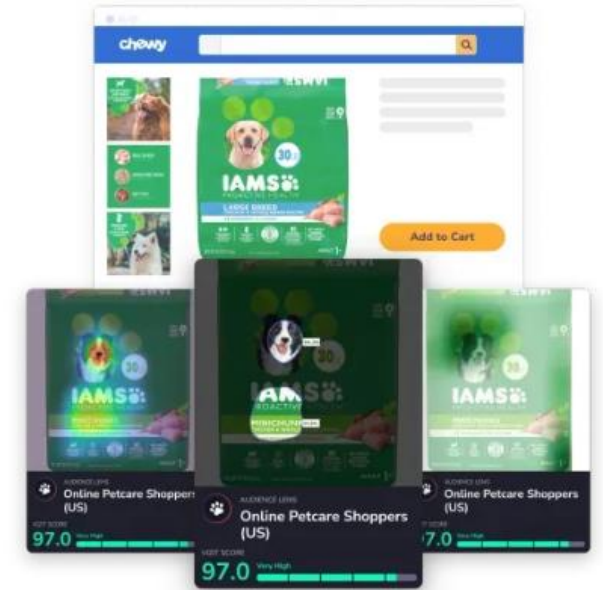

Ollie: Using AI-Powered Digital Health Tools to Build Trust & Connect with Younger Customers

- In 2024, Ollie acquired DIG Labs, which enabled the launch of a digital health screening tool that offers tailored dog food recommendations based on individual health data
- The company hopes to connect with younger pet owners, who desire tech-enabled and personalized products to improve the quality of life for their pets and themselves
- Since introducing additional Health Screening benefits over the last year:
 - 89% of members strongly agree that screenings are valuable features in their Ollie membership
 - 86% of members strongly agree that Ollie health screenings give them more confidence in their decision to feed Ollie

Mars Petcare: Increasing Conversions with Vizit

- Mars Petcare was looking to identify high performing images on e-commerce sites
- It used AI tool called Vizit to measure how appealing pet food images are to online consumers, which helped to increase conversions by 30% on Amazon for one set of SKUs!
- By testing how different images score with online shoppers, Mars identified which images of pet food packages resonated best with audience segments
- It discovered that consumers in different parts of the world have different preferences as to what makes an image appealing
- The AI-generated data also influenced package design

Start Using AI Effectively

For each marketing task you do, consider:

- **Is it data-driven?** Are you using data to do the task? Alternatively, do you have data you should be using to do the task, but you're not? Consider anytime you analyze customer demographics, product sales, browsing behavior and other data points.
- **Is it repetitive?** Do you do the same thing repeatedly to accomplish the task? Is there a list of defined steps that you follow to get the task done? Example: Weekly or monthly reporting on product sales.
- **Is it making a prediction?** Are you trying to forecast an outcome or behavior? AI is good at identifying patterns based on large sets of data. It then uses these patterns to make predictions on likely outcomes or the next best action.

...if you answered **YES** to any or all, then incorporating AI into your workflow may make a meaningful impact!

AI Use Cases in Marketing

Analytics

- Synthesize data for patterns and emerging trends in real-time
- Continuously pull relevant data points and measure performance on all marketing activities in visually appealing dashboards and interactive reports, proving ROI for each expense in the strategy
- Provide better personalization with a clearer view of your customers and distributors, informed by data.

Social Media:

- Automatically generate social shares from text prompts or from past work your human content teams have produced.
- Automatically schedule social shares to post on the days and times that your audience is most likely to engage.
- Create compelling images and videos for social posts.
- Serve different variations of social shares to different audiences based on their preferences, motivations, and needs.

Website Conversion & Support

- Better engage visitors with contextual greetings via AI-powered chatbots and personalized website content.
- Execute A/B tests of site landing pages, headlines, images, offers, calls to action and more, learn from the results, and automatically apply the learnings into future content.
- Deflect service requests with AI-powered chatbots that can provide relevant answers immediately. Point site visitors to relevant web resources or route them to the best-available human.
- Provide dynamic and personalized pricing based on customer behavior, competitor prices, and market demand to incentivize conversions.

Using AI in Content Marketing

Strategy

- Analyze content performance data
- Analyze and learn from competitor content
- Create or refine content strategies
- Recommend how to improve existing content
- Recommend which new content to create,
- Surface high-value topics, keywords, and content formats

Ideation

- Come up with content ideas, topics, and angles
- Engage in brainstorming exercises with an always, on creative partner
- Generate nearly unlimited variations of headlines and hooks
- Generate nearly unlimited variations of images and creative
- Vet existing ideas for content, creative, and campaigns

Research & Summarization

- Find answers to highly specific questions quickly
- Give simplified explanations of complicated concepts
- Query and converse with data sets
- Quickly surface specific examples, case studies, and stats
- Summarize search results, documents, data, and communications
- Summarize existing content and company information

Content Generation & Editing

- Automatically plan and outline robust pieces of content
- Consistently apply brand guidelines to content
- Generate first drafts of articles, pages, and assets
- Generate images, video, and audio to accompany written content assets
- Generate promotional posts to distribute content across channels
- Professionally edit images, video and audio
- Professionally edit written content

Content Repurposing

- Add narration and summaries to written content
- Convert video, course, and webinar transcripts into ebooks and guides
- Reformat winning creative for different channels
- Repurpose ebooks and guides into different content formats
- Repurpose podcasts and webinars into blog posts
- Turn long-form video into short-form promotional clips
- Turn long-form written content into social posts

What I Want You to Take Away from Today

- When used appropriately, AI offers significant opportunity for marketers to be more strategic and effective
- AI is changing and evolving quickly, but it still is far from perfect and requires a human element
- Experimenting with AI tools and platforms will be essential to finding what works best
- Being a late adopter of AI may cause companies to fall behind

Thank you!
